

The hospitality and welcome I enjoyed in Islamic Republic of Iran is an immortal memory for me. The representatives were very much available on the cold morning to receive me at the airport on my arrival. The accommodation and logistic arrangements were also very comfortable.

The conference was addressed by the dignitaries of the Country. I was very much impressed by the speeches of His Excellencies the Vice President and the President of Iran by his Legal Deputy. I congratulate the Country on maintaining a society with deep brotherhood, respect for each other and co-operation. The speeches by the dignitaries were based on Quranic Ayats enjoining the audience to reduce the remoteness with the book of guidance. I was delighted by the announcement by the Vice President that if a scientist sets the stage to go through the Holy Quran it will be a great step and the Government will help the task.

The education pattern I was introduced in the esteemed Universities like Shahid Behisht, Allama Tabatabai, I found to be an example to be followed by all the Muslims across the World. I was indeed glad to know that the Allama Tabatabai University is the biggest University in faculty of Human Science with many centers of research and 25 journals are being published. The citizens of the Islamic Republic of Iran I found to be in thirst of education and was also glad to learn that the women sect is also highly educated.

It is essential to mention here that the world must know that the people of other religion like Jews and Christians are also the member of Iranian Parliament which is a symbol of secularism. In conclusion I pray ALMIGHTY ALLAH to protect the great Islamic Country from all the odds and envy.

Once again I thank you and the organizer of the international Conference for providing me this opportunity.

JAZAKUMULLAH and Thank you very much,

I remain

Truly yours

A.Majid Parekh
